Fri, Apr 1, 2016 at 9:23 AM

Здравей Дидо,  
 значи говорих с Иван и се разбрахме задачите са следните :

### Първа задача

- добавяме ентити-та .. done
- добавяме репота- done
- експозваме репотата по REST ... само че само за GET заявки done
- конфигуваме секюрити да дава само GET да се достъпва до онези репота за да не може от вън да се инсертуват неща...done

абсолютно **втора задача**(т.е. няма блокери за Дидо.. и може да почне да работи.. само че за целта трябва да си създаде ентита с код или директно в базата за да има нещо):

- добавяне на ViewController/PageController за admin т.е. админ интерфейс
- CRUD в админ

### Трета задача да я наречем

- оправяне на frontendа да показва програмата на база това което е налято в базата.. :) с линкове към спиикъри и етц.

Така за първа задача да ти кажа ендпойнтовете.

Първо за да си създадеш записи най лесно в Applicaiton - main набиии нещо ей такава :

```
VenueHall hall = new VenueHall();
hall.setName("VITOSHA");
hall.setDescription("ala bala na dqsno");
hall = context.getBean(VenueHallRepository.class).save(hall);
```

```
Session session = new Session();
session.setStartTime(DateTime.now());
session.setEndTime(DateTime.now().minus(Duration.standardHours(1)));
session.setSubmission(context.getBean(SubmissionRepository.class).findAll().iterator().next());
session.setHall(hall);
```

```
context.getBean(SessionRepository.class).save(session);
```

Това ще ти създаде HALL със Sesiq... първия Submission ... за да имаш събмишъни.. отвори localhost:8080/admin user :admin pass: password точно ей в този админски интерфейс после ще се появят и Sessions/ Halls ама това е втора задача да я наречем.

Сега за самите end points ... най важния ти е ей този :

<http://localhost:8080/sessions>

Тук ще ти върне всички сесии .. (има пейджинг т.е. ще ти върне само първите 20.. ако искаш повече параметри ?size=30 и page=2 или 3 етц. има и тотал елементс във всеки респонс както и на кой пейдж си.

Там ще видиш има линкове ... модела е следния:

VenueHall има име и бла бла

Session има линк към Submission-а (който явно е потвърден) както и линк към залата, в която ще е сесията.

Submission от своя страна има линк към SPeaker от където можеш да вземеш имена, био и всичко което се сетиш за спиикър.

Така да се върнем на Сесиите

```
{
  _links:
  {
    self:
    {
      href: "http://localhost:8080/sessions{?page,size,sort}",
      templated: true
    }
  }
}
```

embedded:

```

```

Има старт тайм и етц. както си поискал (бтв в JodaTime са ако искаш да ги десериализираш...)... доло има линк към виждаш ли sessions/1/submissions т.е. дай ми submission-ите на тая сесия (то е one2one така че е един submission)

Има и към зала... там е ManyToOne.. ама пак ще получиш една зала

Пример за зала <http://localhost:8080/sessions/1/hall>

```

  }
}
```

Тук има ВСИЧКО.. ЕДИНСТВЕНАТА ГРЕДА .. е снимката... снимката ще ти я върне в не много удобен вид... за да вземеш снимката на лектора просто използвай ендпойнта :

`/image/speaker/{pk}`

Този ендпойнт изобщо в `/image` може да се ползва за `speaker`-и, партнери и спонсори .. `pk`-а е ясен .. в примерите по горе навсякъде е "1" та целия URL е <http://localhost:8080/image/speaker/1> и ще ти върне картинката като картинка с `content type i etc...`

Амиии...това е... пиши ако нещо :) принципно е само линкове и навигиране по линкове...

Найден

Здрасти Дидо,

Двамата с Найден ще правим backend-а. Да те свържа с него, защото той ще е driving force-а, аз ще съм coding monkey-то. :)

Поздрави,  
Иван
